TRANSCRIPTS	83

Dear Teacher,

From all the Richmond team we would like to transmit our hope that this Teacher's Resource Book helps you and your students to make the most of the **GO! 5** project. You will find the following three areas inside, each containing worksheets, their corresponding answer key and where appropriate, the audio transcript. These areas are designed to cover all the possible needs, queries or difficulties your students may have.

Language:

The worksheets comprising this section focus on the vocabulary and structures presented in the Student's Book. You will find the most appropriate moment for the students to work with the material indicated in the Teacher's Book.

To help with the mixed ability in your class we have provided the worksheets at three levels: the reinforcement worksheets have been created to ensure that all students have an opportunity to assimilate the essential structures. The consolidation worksheets will allow you to see how the students are progressing with their learning. The extension worksheets are for those students who can go a step further and may need the extra input to stimulate them. With these three levels we give all the children the opportunity of extra practice and development.

CLIL:

In this section you will find more practice to help your students to understand the broader topics covered in Lesson 4 of the Student's Book. Through interesting facts and details about the world and their environment, the children will take new terminology on board effortlessly. All CLIL topics reflect areas that have been covered in their equivalent school subject, thus making their comprehension easier for the student.

Tests:

You will find four types of tests: a general diagnostic test, unit, term, and end of year tests. This format allows you to choose the most appropriate time to gauge the level of your students' understanding and assimilation of new language. The diagnostic test can be used both with new students and returning students as an indication for the teacher of the class level after the long summer holidays. The remaining tests are both varied and thorough and will consolidate the language worksheets. The tests include work on the four basic skills and include two different versions for the same unit based on level of difficulty in order to meet the needs of your students.

Warm regards,

The Richmond editorial team
